OUR MISSION.

"Our mission is to develop globally competitive technology talents to provide cost effective technology application development and sustainment solutions to clients across the globe."

Risul Islam, CEO
GainHQ

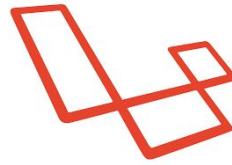

TECHNOLOGIES WE USE.

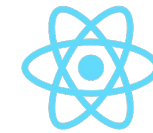

We work on Node JS

We build software using Node.js. We are using Vue.JS, React JS, GraphQL and others technologies to make the great softwares.

We love Laravel

We love to solve your problems through the web applications. Laravel and Vue.. makes it easier to make our awesome applications.

We like React.js

We like React.js for building user interfaces or UI components. It makes painless process to create interactive UIs & single pages.

We use Vue.js

Vue.js helps to make progressive, incrementally-adoptable JavaScript framework for building UIs.

We prefer Cloud Computing

We use Amazon Web Service for reliable, scalable, and inexpensive cloud computing services

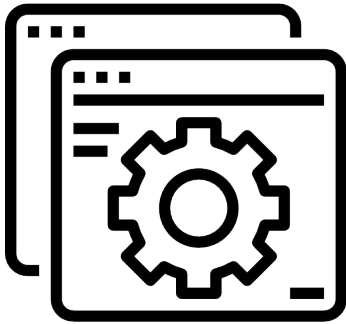

Database Management

We define, manipulate, retrieve and manage our database with MySQL & MongoDB.

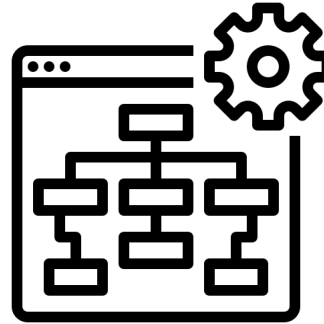

WHAT WE DO.

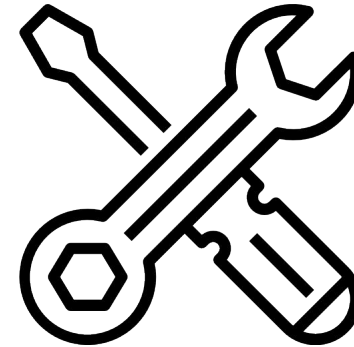

Custom Web Application

GainHQ build web based softwares for our clients based on their needs. Doesn't matter how difficult the problem is, we are here to solve the problems.

Inhouse Software Development

We develop different types of software to solve different kinds of problems. We have some ready software to provide you. Feel free to contact with us.

Software Customization

We provide customization of the softwares for our customers. To fit your business needs we are here to give you the best customized softwares.
