Our IT off-shore services to Japanese companies

It is possible for your company to form Bangladeshi engineers as a remote development team while living in their home country. Since our company handles recruitment, contracts, and personnel and labor management on behalf of the hiring company, there is no need to perform complicated work such as labor management and salary payment across countries. In addition, the engineering team can work in our Bangladesh Dhaka office, so it is possible to work while collaborating effectively with others in the optimal office environment for engineers. (Please contact us for details)

Japanese Language Training (Alliance with Universities)

MOU with United International University

News Desk

United International University (UIU) and Venturas Ltd have recently signed an agreement at the university campus. UIU VC Prof Dr Chowdhury Mofizur Rahman and Venturas CEO Yoriko Ueda inked the pact on behalf of their respective organizations. According to the treaty, the company will provide the student with Japanese language courses, said a press release yesterday. Venturas Ltd, which is a rising Japanese education-tech company based in Bangladesh, has supported more than 50 fresh graduates from top level universities in Bangladesh to get hired by Japanese companies to work in that country, it added.
