Detailed Narrative Description of Project:

As Bangladesh is moving towards digitalization and planning to harvest the benefits of the 4th industrial revolution with the introduction of emerging technologies. Due to the technological revolution and the country's economic achievement, time demands to deliver every service with the touch of technology. Accordingly, Bangladesh Post Office (BPO) is planning to initiate different projects to provide benefits to customers digitally and efficiently. Therefore, the Bangladesh Postal Service automation is essential in providing services with ease and speed through digitalization. Besides, SDGs targets 5. b, 8.10, 9. c, 17.6, and 17.8 encourage the Post and Telecommunications Division (PTD) to take the new technology through BPO.

Under this initiative, the BPO planned to construct a modern technology-based mail processing center and introduce e-commerce-based products and services by 2026. The Feasibility study will assess the business models of BPO branching into e-Commerce services, technical and financial aspects of generated ideas spawn out of Digital Service Design Lab (DSDL), and also the technical and economic feasibility of a possible Automated Mail Processing Centre (AMPC) for Bangladesh Post Office.

Thus this study is being undertaken to carry out the requirement analysis on digital transformation, service model designing, and overall enhancement of postal services. The scope of work under the study has been mapped below:

The core objectives of this project are:

- ✓ To provide a high-level enterprise architecture design and technical Feasibility Study and prepare a Road Map/ Master Plan on the Digitalization/ Automation of BPO.
- ✓ Develop a business model for implementing a business service where BPO will transport Agro-based products grown by marginal farmers directly to the end consumer.
- ✓ Originate a business model for BPO mail and parcel services. The business model will consider future trends, primarily focusing on the growing digital commerce market.
- ✓ Conduction of a feasibility study on the Automation of Mail Processing Center (AMPC). Requirement Analysis of Automated Mail Processing Center (AMPC) for Bangladesh Post Office with suitability and capacity building assessment of current and upcoming MPC (Mail Processing Center).
