5. Our Methodologies:

In Skills we use modern content and methods and we focus on every aspect of your learning.

Everything we do is tailored in that way to develop your knowledge, skills and results. We understand challenges that you meet. As we also live and do business in Serbia, we understand the market too.

Our training programs are designed to meet your personal needs for development. Even before, during and after training, we make sure to understand your needs. Our experienced trainers deliver tailored made training to you. Training are designed and implemented by professionals in their areas. We are proud because we achieve excellent results and invest time and energy in order to create modern and up to date training.

Especially we pay attention to understand HOW adults learn. Therefore, our programs are designed as interactive, motivating and fun. We combine different approaches, so dynamics and energy are not always the same, which provides opportunity to examine and practice what we teach even before participants go back to their work and try it in practice. It is very important to say that our training are conducted of **80% of practice and 20% of theory.**

5.1. Hands-on learning

- Our trainers go to great lengths to relate the topics to their own real life experiences in the working environment to ensure that all students understand how the materials presented are relevant to them and the job they do.
- PowerPoints and flip-charts are used as key training aids to convey subjects in an easy-to-understand format.

5.2. Case studies

- Case studies are used in class exercises to assimilate real life issues.
- Participants get to appreciate the entire scenarios, processes and results from the real-life examples used by the trainer.
- Training and workshop objectives are well defined and participants know what is expected of them.
- Students participate in active discussions in order to dissect issues presented to them and formulate workable solutions.

5.3. Review exercises

- Review exercises are employed which serve both as “check points” for participants, as well as providing a way for trainers to gauge the trainee’s comprehension of the subject and their ability to perform tasks taught.
- Whenever time permits, additional review exercises and quizzes are used to further familiarize participants with the various topics.

5.4. Q&A assessments

- When necessary, course examinations and assessment Q & A sessions are employed to support any final course assessment and to ensure that participants have benefited from the training.

5.5. Review exercises

- Review exercises are employed which serve both as “check points” for participants, as well as providing a way for trainers to gauge the trainee’s comprehension of the subject and their ability to perform tasks taught.
- Whenever time permits, additional review exercises and quizzes are used to further familiarize participants with the various topics.

5.6. Certificates of achievement

- Participants with at least 75% attendance will be awarded a Certificate of Achievement as evidence of course mastery.
