Law Enforcement Support

Law enforcement agencies hold critical information, making them the prime target of cybercriminals. Our law enforcement cyber security Investigation program is designed to provide law enforcement personnel with the knowledge and skills to protect themselves, their department, and their communities from cyber threats.

The program will provide training on crucial Cyber Investigation topics such as Internet Investigation, incident response, digital forensics, etc. by expert instructors. The program includes hands-on training based on real-life scenarios to sharpen your cyber security skills to solve most cybercrimes.

Digital Forensic Support & Solution:

Cyber forensics is the branch of forensics that focuses on conducting an investigation based on shreds of evidence collected from digital devices. Digital forensics involves the investigation of computer-related crimes with the goal of obtaining evidence to be presented in a court of law. Decodes Lab will help you to find the evidence if you or your organization fall cybercrime.

Cyber Security Solutions

With increasing use of the internet and concerns about its security, especially when it comes to things like consumer information or private details, there is considerable need for computer experts to work in ethical hacking field.

Organizations today recognize the strong need for information security. Onsite and dedicated cyber security solutions and organization wide implementation are offered to clients looking to secure their companies from any cyber threats and security breaches. Decodes Lab Ltd. guides companies towards a stronger and more secure cyber presence.

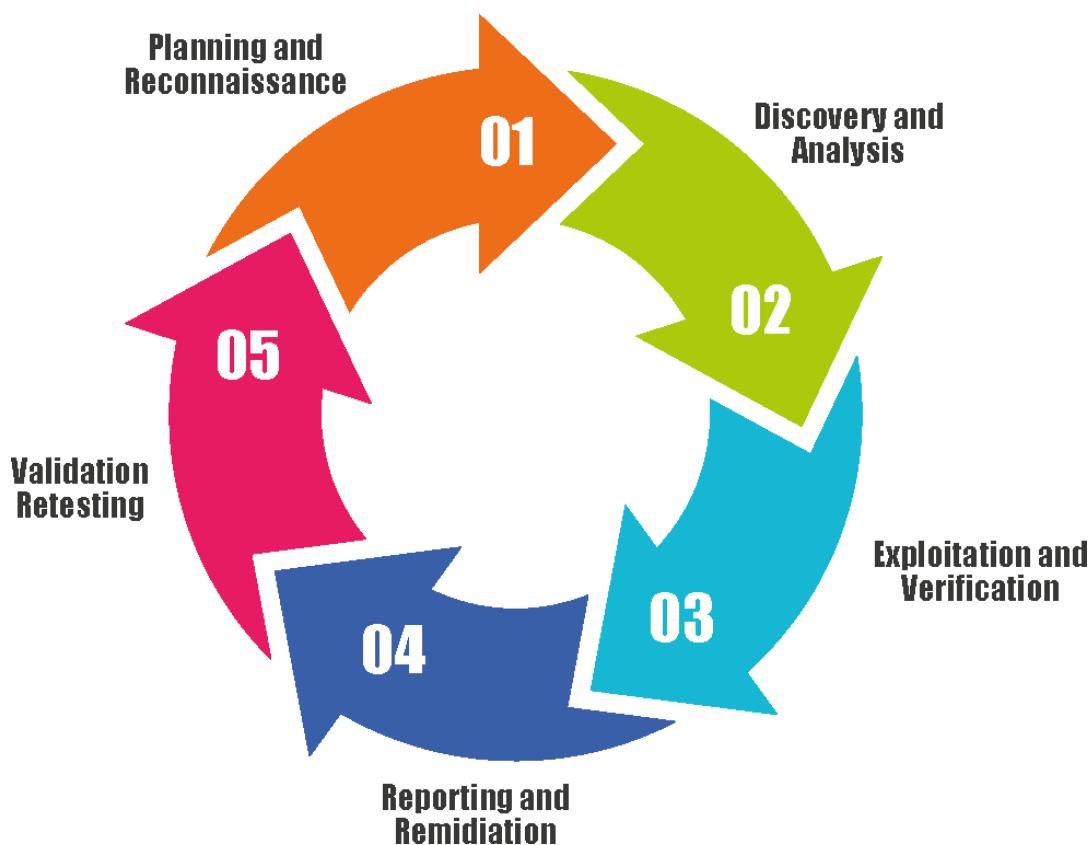

Vulnerability Assessment & Penetration Testing

A vulnerability assessment is the process of identifying, quantifying, and prioritizing the vulnerabilities in a system. Decodes Lab Ltd. provides vulnerability assessments during which it closely maps the network architecture, examines all open ports, hosts and services with access to the Web, and ensures that these network devices are secure.

The evolving tools, tactics, and procedures used by cybercriminals to breach networks mean that it's important to regularly test your organization's cyber security.

VAPT helps to protect your organization by providing visibility of security weaknesses and guidance to address them

IT & Cyber Security Training:

We provide Corporate Training, On-site customized, interactive and hands-on IT security trainings for corporate clients. We have interactive Classroom based Training, In-house lab sessions with industry-consultants and IT security certified instructors.

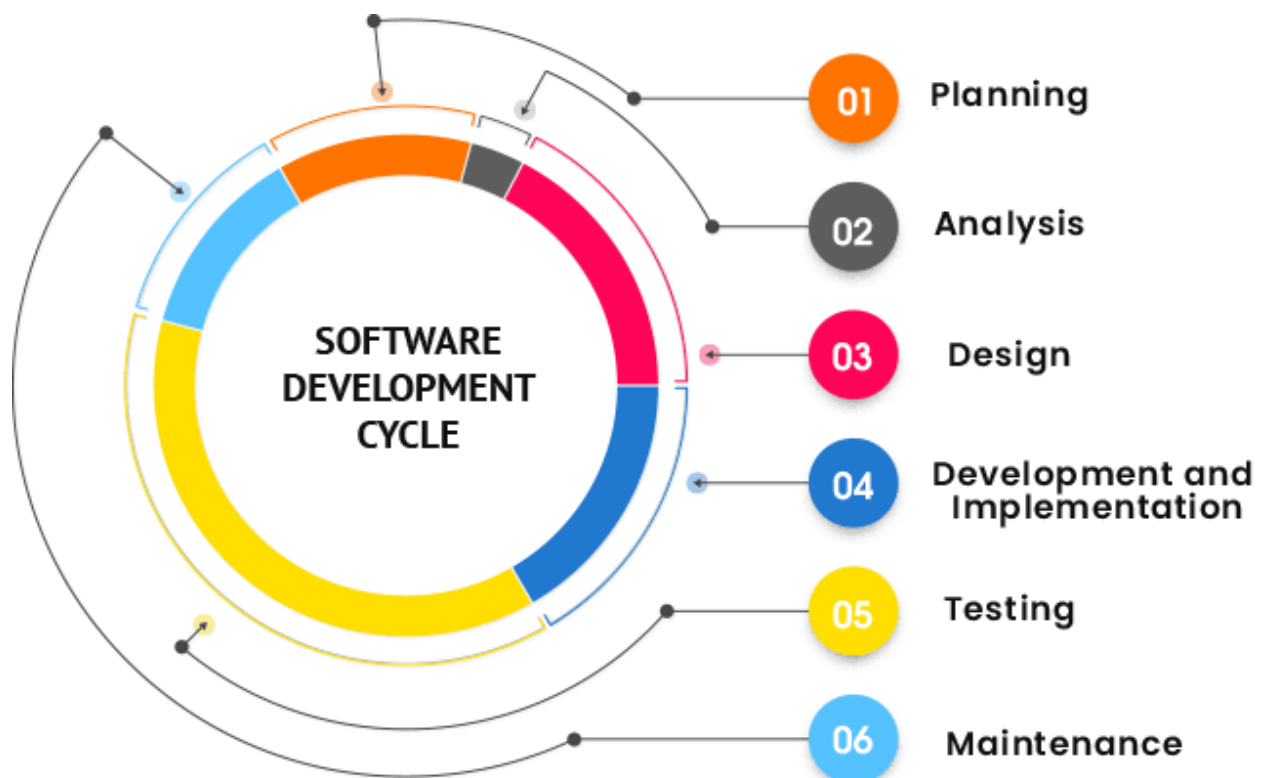

We Believe Quality n practical Training to Skill People in IT Security Industry. Decodes Lab has successfully trained and developed over thousands of IT Security professionals who are currently engaged in the ICT industry at home and abroad. We have the international and local experienced resource pool to deliver the quality training.
