OUR CLIENTS

Yugabyte's co-founders are database builders and operators who met at Facebook, where they scaled the platform from millions to billions of users in just a few years. The team made a bet that the trends they experienced – microservices, containerization, high availability, geographic distribution, APIs developers love to use, and an appetite for open source – would affect most if not all businesses in time. They came together in February 2016 to build YugabyteDB, the distributed SQL database built to power global-scale, cloud native applications.

Purabi General Insurance Company Limited is one of the leading General Insurance companies in Bangladesh since 1983. Clients are the spirit of our business, so we build a genial & realistic relationship with clients. PGIC enlarge its network by establishing branch offices. PGIC provides general insurance coverage all over the country.
