About Us:

Shiram System Limited has been established last of 2017. The company was formed in last of 2018. The concern area of the company is to develop various automation system for various types of services. Since it was setup, it is trying to play various sectors to come under partial or full automation to make the system easier. As a result, some of the services are developed. This company also helped various companies to develop their custom services and management systems to run their company safely and swiftly. The company still trying to develop more and more, but still a lot more to go. Here are the areas currently Shiram System Limited is offering to help you.

Our Services:

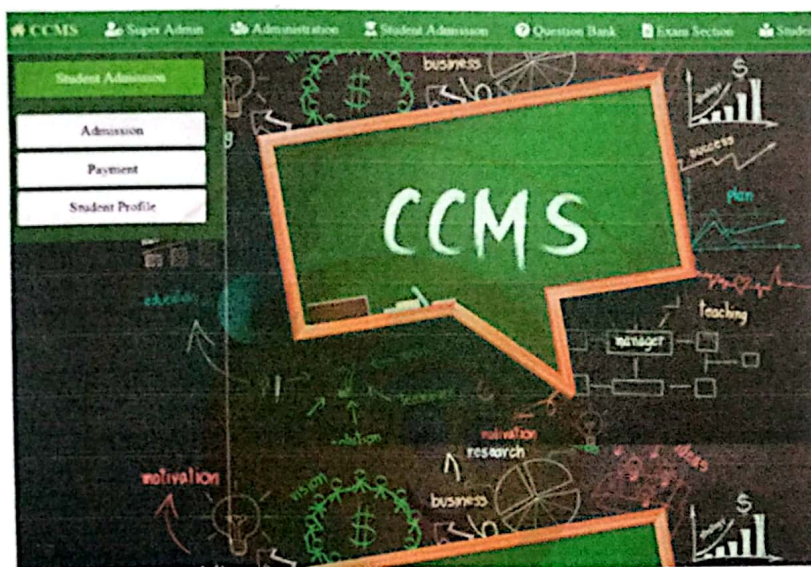

- **Bulk SMS:** We provide Bulk SMS service in Bangladesh. We provide masking SMS to all operators as well as Non-masking SMS too. We guarantee 100% delivery (with valid and open numbers) of SMS to the customer with low price. Our server uptime is 99.99%. Also we offer zonal SMS service according to operators.

Increase Your Sale By using

Shiram System Limited

- **Coaching Centre Management System (CCMS):** We provide "Coaching Centre Management System". In this system we develop easy student management system. It includes student admission, student attendance, student payment, student exam and result, OMR based exam script evaluation, central and branch wise merit list, one click sms to all students and many more.

- **Soft OMR:** Software makes your MCQ exam system softer. Now you can evaluate thousands of exam scripts in minutes. Just collect, scan, process and you are done. Print the result or take export in digital format (Excel/Word). And it is cheaper too.

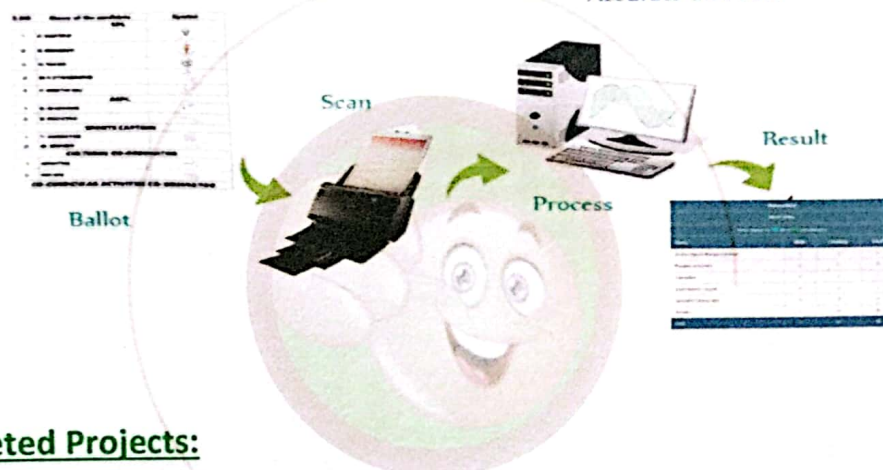

Shiram System Limited

- **Fast Election System (FES):** Fast Election System (FES) enables you to calculate and publish election result within a very short time. This system is very fast with 100% accurate. It can handle hundreds of candidates and process thousands of voters' vote within a very short time. It also detects wrong votes, over and under voting ballots. We provide full ballot paper design, ballot paper supply, voting calculation with different criteria and hand over the 100% accurate result to the proper authority within a very short time like hour or two.

Fast Election System (FES)
