Dupno broadcasting service offers more than just broadcasting through SMS, Voice Mail, E-mail, WhatsApp and other platforms regarding marketing, greetings, discount/offers, credit dues and so on at the most efficient price in the market.

GET INTRODUCED WITH VTS

What is VTS ?

A vehicle tracking system is the system that allows tracking and controlling of vehicles via an online computer, smart phone, tablet, etc. on a 24/7 basis thanks to GPS satellites.

Why to Use

The requirement of vehicle tracking only for car owners just to secure their moving assets is a thing of the past. In the modern era, a VTS device is capable of tracking vehicles but it can report, analyze routes, provide improvement leads, and so on.

What's Growth ?

The post covid period has become 27% more dependent on online-based and door-step-delivery services. In this regard the requirement for tracking a car, truck, bike, even a person has risen at a greater rate. The industry is experiencing extensive growth and we are sailing the most reliable boat in this wave.

YOUR BENEFITS

The number of vehicle using GPS fleet tracking technology has **increased from 34% in 2020 to 49% in 2021.**

Fleet technology customer survey, focusing on key areas

96%

of fleets using GPS tracking service found is beneficial.

55%

reported unhappy with service from other companies.

44%

Rated increasing costs as a top challenge to daily fleet operations

32%

Reported a positive ROI in just six months of implementing fleet tracking technology

Dedicated customer support and service is the key area to customers in which customers prefer us.

Video monitoring is a bleeding-edge tech to be recognized, said by our respondents.

An average 8% **decrease** in fuel costs

11% **decrease** in accident costs

10% **decrease** in labor costs

USERS OF VTS

Overall, 72% of all respondents currently use GPS fleet tracking software, up from 64% in 2019. While enterprise and medium-sized fleets lead the way in adoption rates, small fleets have increased their rate of adoption by an impressive 12% over the last year. This signals an upward trend on the value that businesses of all sizes place on GPS fleet tracking technology.

The average fleet size for all respondents to the survey is 611 vehicles; these fleets are composed of various vehicle types.

Trailers	214
Light-Duty Trucks	209
Heavy-Duty Trucks	198
Cars	150
Medium-Duty Trucks	116
Off-road equipments	78

Use of GPS Tracking
by business size

Use of GPS Tracking by industry:

Looking at the use of GPS fleet tracking by industry, it is not surprising that transportation continues to lead the way in utilization. However, the individual cars — followed by construction and garments — is quickly catching on. It's only a matter of time before more players in various industries realize the true benefits of having an efficient technology toolbox.
