BRAND OF CHOICE

PoTek is one of the world's leading video surveillance and networking equipment supplier. With stably increasing revenue and practical business running philosophy, PoTek has been ranked as one of largest public-listed company among the Malaysia and Taiwan surveillance and networking industry. PoTek makes every effort on the innovation of technology, product and implementation. Based on years of research and industry experience, PoTek has obtained a leading position on mobile platform support and provides a full range of surveillance products.

XmEye Cloud PoTek's mobile application software is the world's most downloaded surveillance software. It realizes full-functioned remote control and fulfills the market with growing demands of smart phones and tablets. In 2010, Push Video, a revolutionary active notification system, was introduced on XmEye Cloud and has been applied to POTEK's full range products.

With strong market base on analog solutions, PoTek has also made a breakthrough to meet the coming new era of IP surveillance. New generation standalone NVR/AHDVR is the simplest solution that integrates video surveillance, remote control, and storage. With its support of plug & play technology to simplify the complicated network configurations, all the IP configurations can be completed within 3 minutes automatically. This NVR solution offers users an easy way to record and playback a video on intranet. Furthermore, it serves as NAS for remote offsite backup on the Internet to make a copy of your important images. It supports Full HD 1080P display, giving the best image quality on LCD / LED monitors and showing its advantages completely. A more impressive thing is that it can be configured to be a data source for a CMS (Central Management System) to maximize the efficiency of IP-based surveillance and remote backup.

PoTek is a company that is willing to embrace challenges, implement new technology, and bring new vision into the industry. We made differences and will continue to do so.

Future Vision

To provide the most competitive products is the best accomplishment PoTek achieved these years.

It also enabled PoTek to be the winner in the market. In future, PoTek will continue to combine the distribution experience of semiconductor component and the leading supplier advantages of security surveillance.

With these advantages, PoTek insist its technology developing and keep promoting its digitalization, integration, and networking products. PoTek will provide worldwide customers the best price, best function, and best service
