Orders

A fully-integrated order management application accessible via both web and mobile.

Products

Categorize and classify hundreds of SKUs with packing dimensions that will help streamline shipping.

Inventory

Keep track of every SKU and automate inventory fulfillment with inventory module.

Courier Partners

Save dispatch time by integrating directly with digital courier partners with API.

Reports

Generate KPI reports instantly and automatically.

Recycle Bin

A resting place of all duplicate or irrelevant records before you delete them forever.

Customers

Keep track of all incoming customers, customer logs, and locations in one module.

Purchase

Keep track of all purchases along with tags of requested, received, and stored items.

Vendors

Maintain list of all existing vendors and automate purchase fulfillment via vendor module.

Locations

Keep a geocoded record of all customer locations, vendor locations, warehouses, shipping and billing locations.

Expenses

Manage all-basic operational expenses and insights to take your business to the next level.

Access

Maintain your organization's professional structure and hierarchy by setting access rights for every group of users.

Management

Measure all relevant KPI's and course correct your business by making data-enabled decisions.

Sales Representative

Click-and-tap to record orders in the fastest order management application in the region and make your customers happy.

Customer Support

Keep logs and notes of customer queries and provide company information to customers using Nuport's specialized tools.

Operations

For the team responsible to maintain inventory and packaging, and move the products out of inventory to the hands of the customers.

Fulfilment

For people dealing with 3rd party courier managers and logistics operators.

Finance

Perform all basic accounting functionalities and generate weekly or monthly accounting reports.
