Company Profile.

2024

Ontik Technology

THINK AHEAD

Our journey: From innovation to empowerment

Our narrative of innovation, growth, and empowerment commenced in 2016. As solution providers from the outset, we tackled fundamental office challenges through automation. Now, on a global scale, we meld a dynamic presence with local insights to craft bespoke solutions.

Our culture fosters excellence, pushing boundaries, and uniquely solving complex challenges. Beyond tech consultancy, we're mentors, nurturing future leaders to drive positive change in the evolving tech landscape.

Mission

Our mission is to ascend as a globally renowned outsourcing powerhouse, distinguished by our commitment to delivering excellence. Fueled by top-tier resources, we aim to redefine industry standards, providing unparalleled outsourcing solutions that elevate businesses worldwide.

Vision

Ontik Technology aspires to be the creative nexus birthing transformative products. Our vision is to cultivate an environment where ideas flourish, innovations flourish, and our commitment to pioneering solutions establishes us as a hub for groundbreaking advancements in technology and beyond.

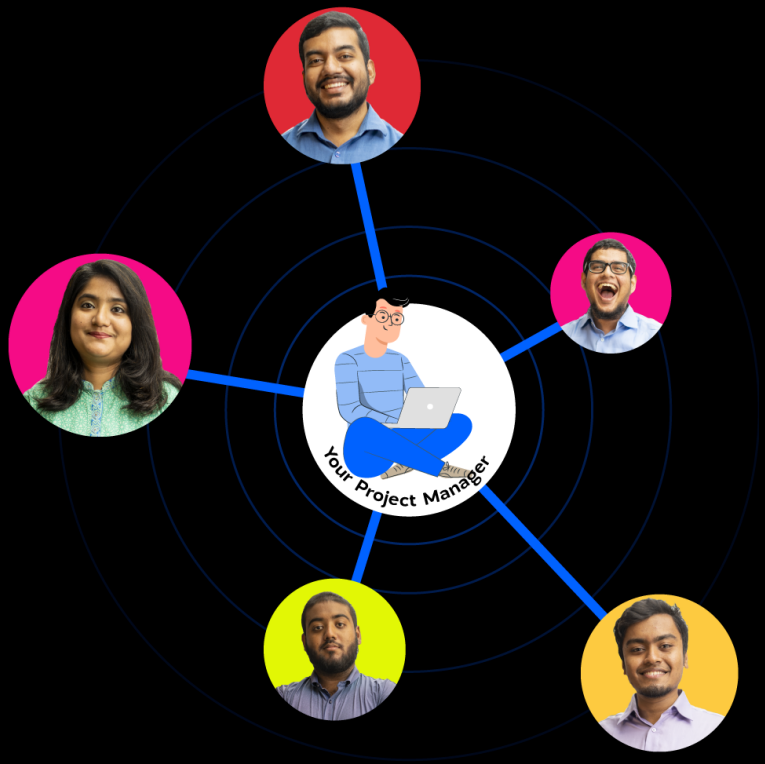
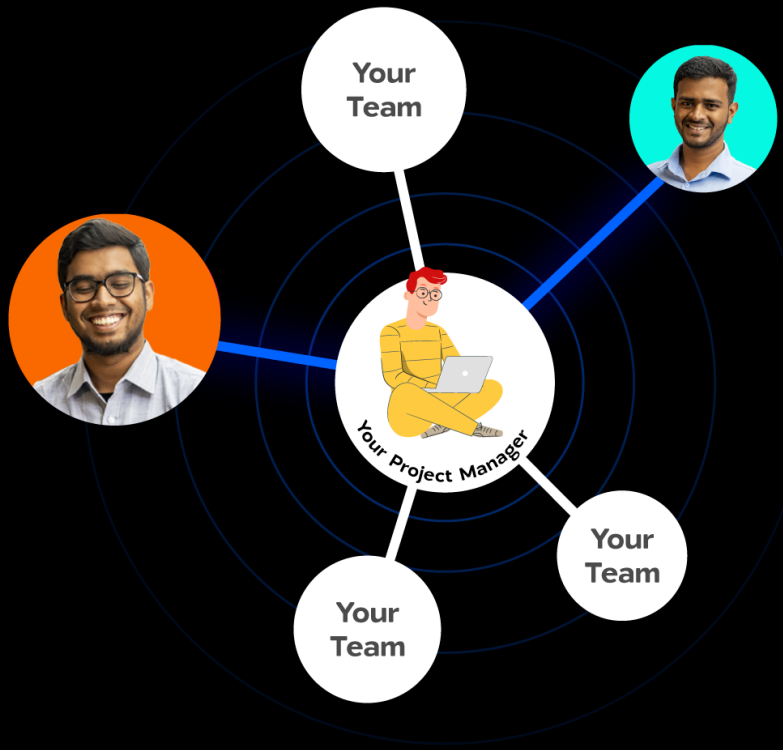
- Customized expertise for unique project needs
- Commitment to exceeding expectations
- Seamless integration into your workflow





Team Augmentation

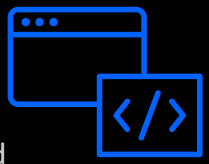
Supercharge your team's capabilities with our flexible augmentation services.

- Scalable solutions for varying project demands
- Enhanced productivity and efficiency
- Seamless integration with your existing team

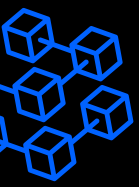
Solutions.

Web Development

Crafting dynamic web solutions that elevate your online presence and user experience.



- Responsive and visually appealing websites
- Seamless navigation and user-friendly interfaces
- Customized web development tailored to your brand



Web 3 Development

Pioneer the future with our Web 3 development, integrating blockchain and decentralized technologies.

- Smart contract development for secure transactions
- Decentralized application (DApp) creation
- Innovate with the latest in blockchain technology

Mobile App Development

Empower your business with cutting-edge mobile applications for a seamless user experience.

- iOS and Android app development
- Cross-platform compatibility
- User-centric and intuitive mobile solutions

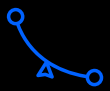
Artificial Intelligence

Transform your business with AI solutions that enhance efficiency and decision-making.

- Machine learning for predictive analysis
- Natural language processing for intelligent interactions
- AI-driven automation for optimized processes

UI/UX Design

Elevate user engagement with our intuitive UI/UX design solutions, creating a seamless digital experience.



- Intuitive and visually appealing interface design
- User-centric approach for enhanced usability
- Crafted designs aligning with your brand identity

BI & Data Science

Unlock the power of data with our BI and Data Science expertise, driving informed decision-making.

- Data analysis for actionable insights
- Predictive modeling and forecasting
- Tailored BI solutions for your business needs

ERP

Empower your business with our customized ERP solutions, ensuring seamless integration and efficiency.

- Tailor-made ERP solutions
- Software programming for robust functionality
- Streamlined and integrated business processes

Cybersecurity

Safeguard your digital assets with our comprehensive cybersecurity solutions, ensuring peace of mind.

- Threat detection and prevention
- Secure data encryption and privacy measures
- Continuous monitoring for a resilient cybersecurity posture

Some of our works.

Onguard

MVP Development, Canada

We developed an AI based “no-internet” appointment scheduler in collaboration with UNC Chapel Hill’s Carolina Health Institute Program.

CircleBet

MVP Development, Australia

CircleBet is an online social betting services firm that offers a unique and customized betting service. The client sought our expertise to create a groundbreaking platform that seamlessly integrates social interaction with sports betting, offering users a unique and customized betting experience.

Aerolex
ERP & CXM, Bangladesh

Aerolex is a prominent player in travel and hospitality. Together, we developed a customized Enterprise Resource Planning (ERP) system, optimizing Aerolex's operational efficiency in reservations, inventory management, and financial operations.

Checkbox
Custom Solution, Bangladesh

Checkbox is a pioneering dropshipping company in Bangladesh. As their dedicated tech partner, we contributed to the inception and development of the first freecommerce platform in the country, empowering entrepreneurs to establish online stores through social channels. Our ongoing collaboration reflects a fruitful, long-term partnership.

Emkay
ERP, Bangladesh

Ontik Technology partnered with Emkay Construction, a leading construction firm, to streamline and enhance their operations. We developed a customized Enterprise Resource Planning (ERP) system, addressing Emkay's specific needs in project management, resource allocation, and overall construction processes.

Chippit

Team Augmentation, Mobile Development, Australia

Chippit is a platform that enables users to pool money together for shared financial goals and we helped them with engineer sourcing and consultation. We hired two mobile developer and one ML engineer as augmented resource for them.

Eli Muse

Founder & CEO, Chippit

“Ontik Technology set up our full development team in just 2 weeks' time! It takes other agencies more than 5 times as long to do that. We're already on track to finish our development after just a few months!”

FITMATE

Fitmate

MVP Development, Australia

Fitmate is an app-enabled subscription-based gym access service. The client worked with Ontik Technology as their MVP partner, comprehensively building their first go-to-market app, starting from the UI screens to full-scale development.

Daniel Wight

Co-founder, Fitmate

“ Ontik Technology came in and did everything for us. We didn't have to think about design,development or the tech stack... In 3 months they turned our idea into a complete Unicorn - worthy software. ”
