Dhaka, Bangladesh

OUR GOAL

Our GOAL Is to Become a Bridge of Faith Between Customers and Technology Solution Providers.

OUR MISHION AND VISION

We **(Deshik)** have a **MISSION** to deliver high-quality and cost-effective service and solution for the SME to **Enterprise** Business.

Our VISION Is to Become a Leading IT & Business Consulting Firm in the WORLD.

WHO WE ARE?

Now a days technology is everywhere, from your home to outer world, from learning to teaching, from eating to sleeping, from plan to execution, business to pleasure. everything around us already effected by technology. **BITSCOL** excels in IT & Business

IT & software solutions are like the heart of the technology. Doing business like selling product or services without the help of IT / Software is unthinkable. But choosing the right and best IT solution for your business is not an easy job.

consulting services through developing and implementing solutions for both these needs, having expertise and experience in helping both types of clients for several years.

BITSCOL, from the inception has successfully provided efficient and business-critical web solution to clients all over the world. The company has added mobile application development as well and has successfully deployed several business-critical applications to the clients.

Through hard work and continuous innovation, we can proudly say that BITSCOL can provide end-to-end web and mobile solutions for a wide spectrum of clients

100%

Satisfaction

We strive to challenge traditional thinking and provide Cutting-Edge technology solution that meet the highest quality standards in order to fulfill the long-term needs of business growth

Our VISION Is to Become a Leading IT & Business Consulting Firm in the WORLD.

WHY BITSCOL?

When you need a custom software solution (Web / Mobile) to enhance your business needs, right brainsolution can help out in your endeavor – by providing an end-to-end experience. we think of ourselves as stakeholders of your project, so that we can deliver the highest value. your problems become our headache and our minds would figure out how to best solve that problem so that you don't need to.

BITSCOL, from the inception has successfully provided efficient and business-critical web solutions to clients all over the world.

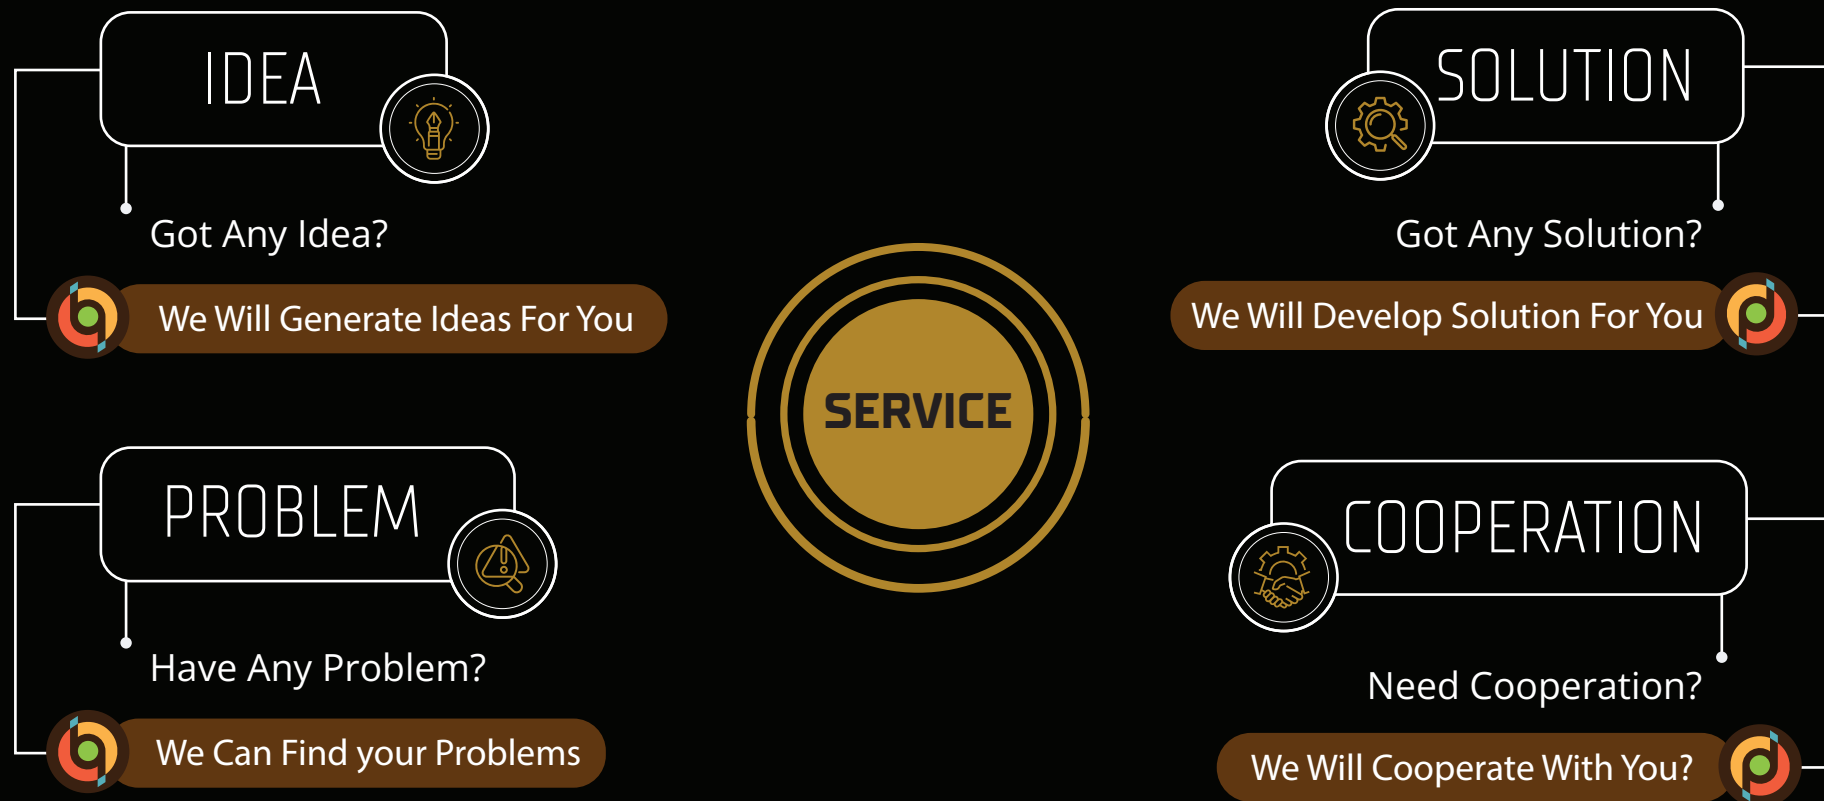

Our expert teams can help you convert your imagination into viable product and can then help realize that in real life. we'll guide you in the entire process and will offer our suggestions based on our domain knowledge as well as understanding of human-computer interaction (HCI). we thrive to build solutions that would make life easy, not complicated.

Our OSS community-friendly developers use the highest standard code to build your product and would often go beyond agreed commitments to build the right product for you, even if that means absorbing extra hours of work. they would consult with industry leaders as and when needed, to make sure the solution you need is top-notch.

Almost all our customers come to us by reference and we believe that is a very good indicator of how our clients perceive our service.

INTRODUCTION

A cloud-based Hotel Management Software that helps hotel industries to streamline their complex task and customer support cycles. Our Hotel Management Software is not just a hotel management system but an automated Hotel ERP solution that will improve your corporate marketing, guest management service, increase your work efficiency & employee productivity, Payroll & Account management and so on. The System will share one single database and all the data will be stored in a secure database so that all departments can see the real-time data. In addition, the system can also be integrated with other modules like the HR module, Restaurant Module, POS system and so on.
