About Us

Blue Oceans Technologies is an IT solution provider, working to deliver all things Tech. We help businesses streamline complex functions, fortify security measures and expand their digital reach.

In today's changing world, with exponentially rising demand for the new, and continuous need for improved efficiency, businesses must make use of customized resources and innovative tools – to survive and expand. We at Blue Oceans Technologies understand what this entails and, as such, draw upon our ever-growing network and domain expertise to deliver adaptive solutions to help businesses grow and keep pace with this change.

Mission

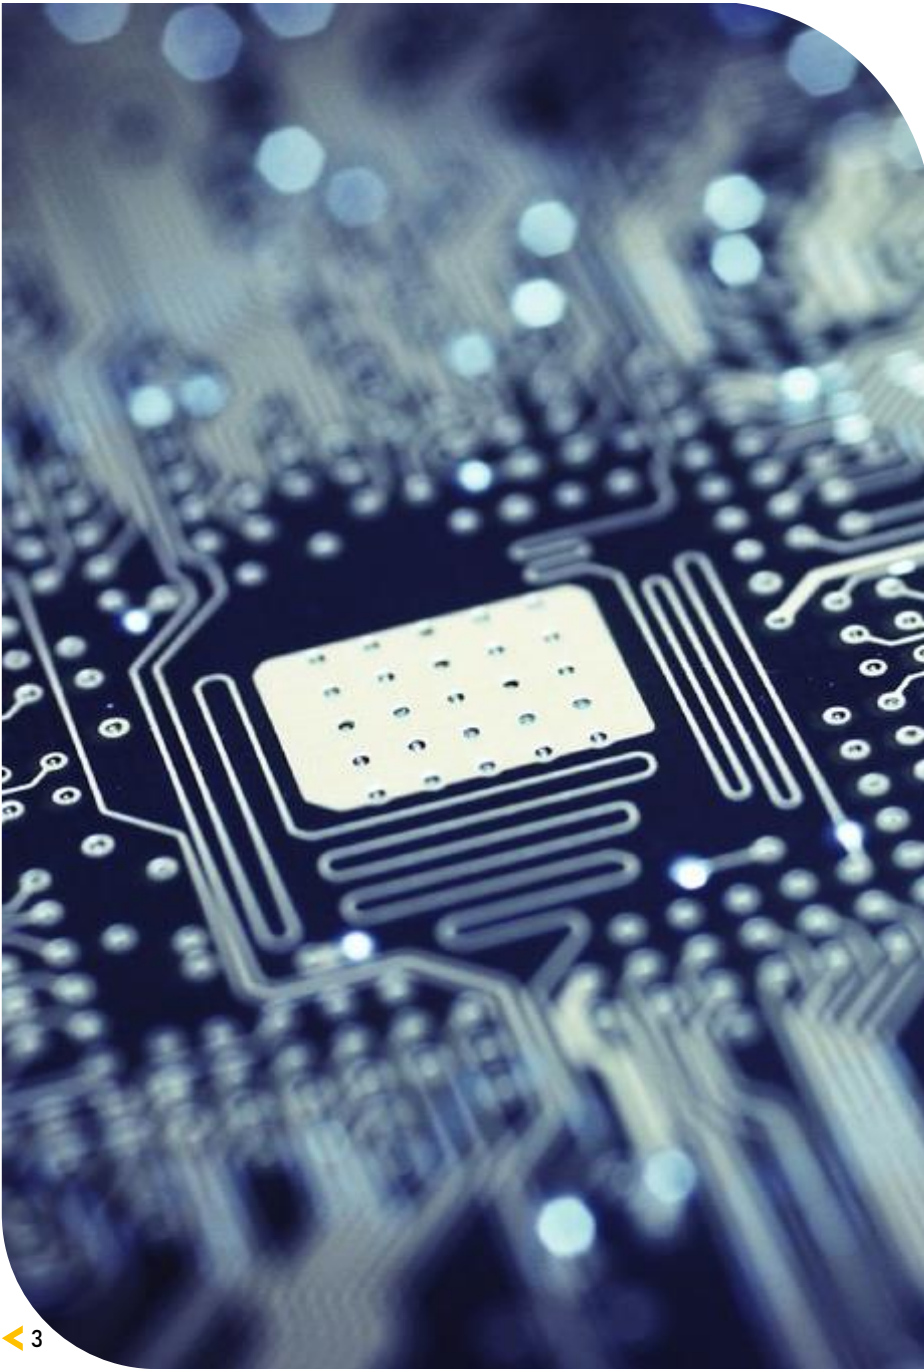

Deliver quality adaptive IT solutions to businesses to improve their operational capacities and pass on greater value to their stakeholders.

Vision

To be the go to IT solution provider; to help businesses grow sustainably.

Values

Continuously learn and adapt; Create meaningful change in technology; Strive for excellence in delivery and always work with integrity to build and maintain trust of all stakeholders.

CUSTOMER LIST

VITTI STHAPATI BRINDO LTD

Products & Services

An up-and-coming IT powerhouse, Blue Oceans Technologies brings to you solutions ranging from web design & development, hardware infrastructure solutions to cybersecurity services and Internet of Things (IoT) based solutions.

Our team comprises highly skilled IT specialists and certified engineers with diverse experience garnered through decades of working with public and private institutions – at home and abroad.

This document presents our core work verticals while highlighting some of our most popular products & services:

Web & Mobile App Development

Website design & maintenance, Open source technology based programming services, Cloud-based solutions

Cybersecurity

CCTV, Digital & Network Video Recording Facilities, Website Vulnerability Assessment, Web Penetration Testing Services

Hardware Solutions

Storage Servers, LAN Work, Data Center Establishment, Office Computers & Peripherals, Video Conferencing Solution

Public Safety Technology

Vehicle Disinfection Tunnel, Hygienization Tunnel, Temperature Screening Devices, Smoke Detection Devices

IoT Based Digital Project Tracking System Platform

Customizable web-based project management software applications, Remote management reporting & tracking systems

Purpose-built IoT Solutions

All-Inclusive IoT security solutions, Employee safety & position tracking devices, Smart Alarm Systems

Web & Mobile App Development

Blue Oceans Technologies is experienced in building websites that are user-friendly, easily accessible and multi-device responsive.

Our engineers have vast experience in designing and maintaining websites for non-profits, commercial and state-owned entities – experience that enables us to utilize cutting-edge technologies in designing websites, increasing user engagement / understanding, streamlining overall organization and layout, encouraging participation of offered services and programs, and minimizing phone and in-person audience needs.

Host of Development Services

- UX Designing
- Site Navigation Improvement
- Wireframe Creation
- CMS Development
- E-Commerce Integration
- Third Party App Integration
- Analytics Tools Provision
- Search Engine Optimization

IoT BASED DIGITAL PROJECT TRACKING SYSTEMS PLATFORMS

Digital Project management & tracking platform is an application or software that will allow a project to monitor remotely. In this software, admin will create project, sub-project, task, sub-task, Project manager, employee, team, worker, supplier, task duration and all other things that are related and being performing in a manual way.

Initially all information of a project will be input in this system and daily basis work, progress, challenges and other job will be updated accordingly here so that using that a central dashboard or work update panel will show the overall view of that project.

System Modules

Admin

- User Role Management
- Administrator Management

User Rights & Profiles

- Employee Profile
- Sub-Contactor Profile

Reporting

- Summary Dashboard
- Project Information
- Task / Package status
- Contactors info
- Contactors On- going task
- Task complete status
- Weekly Project status
- Monthly Project status

Management

- Project Package Registration
- Package Budget Management
- Contactors Management
- Meeting schedule
- Package Registration
- Package Task
- Budget & Work Approval
- Meeting schedule
- Implementation Team
- Construction & upload material
- Contractor Payment Module
- Daily work update

Attendance Management

- User Attendance

Hardware Infrastructure Solutions

Blue Oceans Technologies can help your company gain fast access to essential hardware infrastructure services and equipment to improve business performance.

Host of Hardware Solutions

- Database Servers
- Active Directory
- Desktops and laptops
- Computer Peripherals
- Load Balancing Solutions
- Collaboration Servers
- Office automation equipment
- Video Conferencing Tools
- Software Development Tools
- Switches and Routers
- System Management Tools
- Video Print Web Publishing Solutions
- Datacenter Solution

Cybersecurity

Breaches of security and privacy have the potential to cause the most harm. This is why devices and data need security by default. Blue Oceans Technologies caters to any and all essential digital security needs of an organization.

Cybersecurity services

- Web services protection
- Anti fraud
- Data Protection
- Network Protection
- Security Operations Centers
- AAA Authentication
- 2 factor authentication
- Antispam Solutions
- Vulnerability Assessment
- Web Penetration Testing
- CCTV Surveillance Systems
- Advanced Threat Protection
- Anti-virus protection
- Data leak prevention
- Email monitoring & control
- Encryption
- Bandwidth analysis & mgt.
- Gateway firewalls / UTM
- Intrusion Detection Solutions
- Intrusion Prevention Services
- Virtual Private Network

Purpose-built Internet of Things (IoT) Solutions

The Internet of Things (IoT) is set to make greater impact on society than earlier digital revolutions. IoT builds upon the mass adoption of the Internet and mobility technologies, and is fueled by a need to make our world a more productive, healthier and safer place to live.

Consumer device and industrial equipment manufacturers, automotive firms, service businesses, network and software developers are constructing vast IoT powered ecosystems populated with smart, connected devices.

Blue Ocean Technologies is equipped to incorporate the use of IoT devices in all its over service verticals.

In our Project Management Platforms, for instance, IoT devices can be installed physically at project sites to get work progress report automatically, to track employee health and positioning, to trigger / notify assigned persons to remind them about their tasks automatically.

Advantages of utilizing IoT

- Savings through efficient resource utilization
- Minimize human effort through automation
- Faster activity completion
- Improved security and monitoring
- Enhanced quantitative data collection
