Declaration:

DATADSS is an Innovative, Dynamic Software and DATA Solution Service Providing Company for your best DATA Security, Management, as well as your revenue optimization. We are delivering DATA Services (DATA security, DATA Warehouse, BI Solutions, DATA Centre or DATA mining, etc.), software products, solutions and services over Enterprise Architecture. We also offer software development and customization, offshore software development, professional outsourcing and IT consultancy.

Our major focus areas are:

-  Generalized ERP solutions and services on Enterprise Architecture (EA) methodology for Medical, Garments & Textiles, Corporate Offices, Government and non-government medium and large scale Organizations.
-  Sales and Marketing segment.
-  Online ERP system to Insurance domain.
-  Automation systems for educational
 - Automation systems for educational Institutions E.g. Schools and Colleges as well as Small and Medium Enterprises (SMEs) covering Non-Banking, Banking, and Multi-purpose co-operative sectors.

DATA Warehouse, Business Intelligence and DATA Bank/Centre are our cheering segments as a part of changing IT challenges globally. DATADSS is following Capability Maturity Model Integration (CMMI) standard approaches, a world leading quality management systems for developing best possible standard quality project. We deal your best DATA security, management and revenue optimization services with delivering our worth software solutions.

When organizations are freed from outdated systems, restrictive processes and inflexible technology they can harness the power of their people to adapt today's evolving economy. They can identify risks, analyze opportunities and develop new solutions that meet the changing realities they face.

The technology and tools available to businesses today is extraordinary. The impact of the internet was just the start of a revolution that has seen the convergence of multiple technologies and the emergence of Communication platforms that have opened up new ways of interacting and networking.

We are applying such opportunities to the way we work at DATADSS, rolling out social networks and programs to support us all in helping our users and wider communities globally. We are also applying these technologies and techniques to the products and services we offer to our clients. For example, you might not think of accountants as 'social' people, but at DATADSS being connecting to finance professionals for some time using different technologies. These new practices can bring extraordinary benefits, and we are trying to help our clients achieve them. And that is just the start of it.

Solutions:

We provide our clients with software products and services that are designed to meet the needs of an ever-changing business world. Our solutions have been designed to adapt to any internal or external changes our clients may face, irrespective of industry or market sectors.

Flexibility and choice:

A unique feature of DATADSS offerings is the flexibility and choice, we provide to our clients, especially in terms of how they wish to deploy their solutions. Many of them can either be deployed on their own premises, hosted, or can run in the cloud. They can be introduced as a shared service across multiple divisions or organizations, in their own dedicated environment, or with a range of outsourced business processes, such as payroll or invoice management. To facilitate even more flexibility and choice, we provide various delivery and payment combinations, and multi- platform hybrid computing services.
