QSA Organization

Who We Are

EIC has been the trusted partner of countless enterprises for the last 7 years by offering diverse cybersecurity services tailored to organizations' specific needs.

Mission

EIC's mission is to provide world-class cybersecurity services that empower organizations to defend against evolving threats, achieve digital resilience, and embrace innovation securely. We educate and equip our clients, foster trust and reliability, prioritize sustainability and ethics, and aim for global impact. Through collaboration and continuous innovation, we strive to be the trusted partner in safeguarding businesses worldwide, ensuring they thrive in the digital landscape with unwavering security.

Vision

At EIC, our vision is to lead the charge in securing the digital future for organizations worldwide. We envision a world where businesses, regardless of size or industry, can thrive in a secure and protected digital environment.

What WE DO

Ensuring the security of the IT environment of an Organization is a continuous and challenging effort. Organizations require up-to-date cybersecurity posture, comply with industry-specific regulations, and ensure the security and integrity of financial transactions and sensitive data. Implementing these reduces the risk of security incidents and enhances trust, reputation, and overall business resilience.

Governance Risk & Compliance (GRC)

At EIC, we bring extensive expertise in Governance, Risk Management & compliance (GRC) with the latest technology integration to fortify your defenses in a dynamic threat landscape.

PCI DSS Compliance

Payment Card Industry Data Security Standard (PCI DSS) compliance is crucial for any business handling payment card data. EIC's specialized services ensure that your systems and processes meet the stringent requirements of PCI DSS, safeguarding your customers' sensitive financial information.

ISO 27001

ISO 27001 is the gold standard for information security management systems. Our experts at EIC guide and support your organization through achieving and maintaining ISO 27001 compliance. We tailor our approach to ensure seamless integration with your existing operations, minimizing disruptions while maximizing security.

Swift CSP Assessment

In an increasingly interconnected world, compliance with the SWIFT Customer Security Programme (CSP) is paramount for secure financial transactions. EIC provides comprehensive support to ensure your organization meets the stringent security guidelines outlined by SWIFT, enabling you to operate securely within the global financial network.

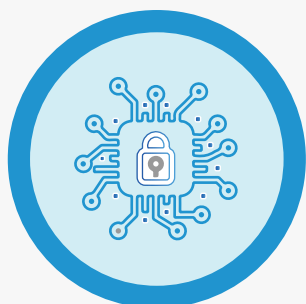

Information System (IS) Audit

Information System Audit brings a thorough assessment process to evaluate the integrity, security, and compliance of IT systems. With in-depth analysis and industry-standard practices, EIC provides comprehensive reports and recommendations to fortify your information systems.

RED TEAM

EIC excels in red team services with seasoned experts, tailored advanced testing, ethical standards, comprehensive reporting, and client-centric focus. Our proven track record, continual support, and adaptability make us a top choice for robust, customized cybersecurity services.

Vulnerability Management

EIC specializes in comprehensive vulnerability management. Our service involves meticulous identification, assessment, and prioritization of vulnerabilities within your systems. With a proactive approach, we offer tailored solutions to address these weaknesses, ensuring robust protection against potential threats.

Penetration Testing

EIC is a CREST-Accredited Penetration Testing Service provider. Our penetration testing emulates sophisticated cyberattack scenarios to assess an organization's security posture. Through a combination of advanced tools and methodologies, our objective is to identify vulnerabilities and safeguard critical systems and data.

Red Teaming Exercise

We provide top-tier Red Team expertise backed by a proven track record in safeguarding organizations. Our expert ethical hackers offer industry-wide experience and global insights with local resources. Utilizing licensed industry-standard tools, we ensure precise assessments.

Dark Web Disclosure Analysis

EIC is your premier choice for Dark Web exposure analysis. Our specialized service offers comprehensive monitoring and analysis of the Dark Web. With cutting-edge tools and expertise, we provide in-depth insights into your online exposure, identifying and mitigating potential risks.

BLUE TEAM

EIC, a leading cybersecurity service provider, offers a comprehensive Blue Team service that encompasses a robust Security Operations Center (SOC) service. Through this service, EIC actively defends against cyber threats by employing a dedicated team of experts who continuously monitor, detect, analyze, and respond to potential security incidents.

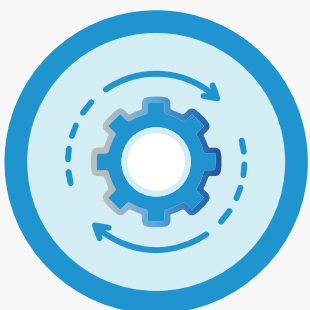

Implementing Security Operations Center (SOC)

EIC offers a robust Implementing Security Operations Center (SOC) service. Our comprehensive approach involves setting up and optimizing SOC operations to fortify your cybersecurity defenses. With a focus on real-time threat detection, incident response, and proactive threat hunting, EIC's SOC implementation ensures a resilient security framework tailored to your specific needs.

SOC Team Support

The Security Operations Center (SOC) team support service provided by EIC involves continuous monitoring, analysis, and response to security threats. It aims to detect, investigate, and mitigate cybersecurity incidents by employing advanced technologies, skilled professionals, and proactive threat intelligence. The SOC team offers real-time oversight, incident management, and remediation to safeguard against potential breaches, ensuring the overall security and integrity of systems and data.

SOC MSSP Services

As a Managed Security Operations Center (SOC) Service Provider (MSSP), EIC offers comprehensive cybersecurity management. This service involves outsourcing the monitoring, detection, and response to security incidents. EIC's MSSP service includes continual threat analysis, real-time monitoring, incident response, and remediation. It leverages advanced technologies and expert security professionals to proactively protect against cyber threats, ensuring the overall security posture of the organization.

Why Choose US ?

Certified Professionals

EIC boasts a team of qualified cybersecurity experts with internationally recognized certifications.

Comprehensive Services

EIC offers a range of services, including IS Audit, SOC, VAPT, and Red Teaming, providing a holistic approach to cybersecurity.

Tailored Solutions

EIC collaborates closely with organizations to understand their unique needs, offering customized solutions for effective security measures.

Continuous Improvement

With a commitment to staying at the forefront of cybersecurity, EIC emphasizes continuous improvement, ensuring clients benefit from the latest knowledge and techniques.

International Accreditation

EIC is an ISO 27001 certified, CREST-Accredited Organization

Client-Centric

Organizational success is our focus while aligning security strategy with business goals.

Strategic Partnerships

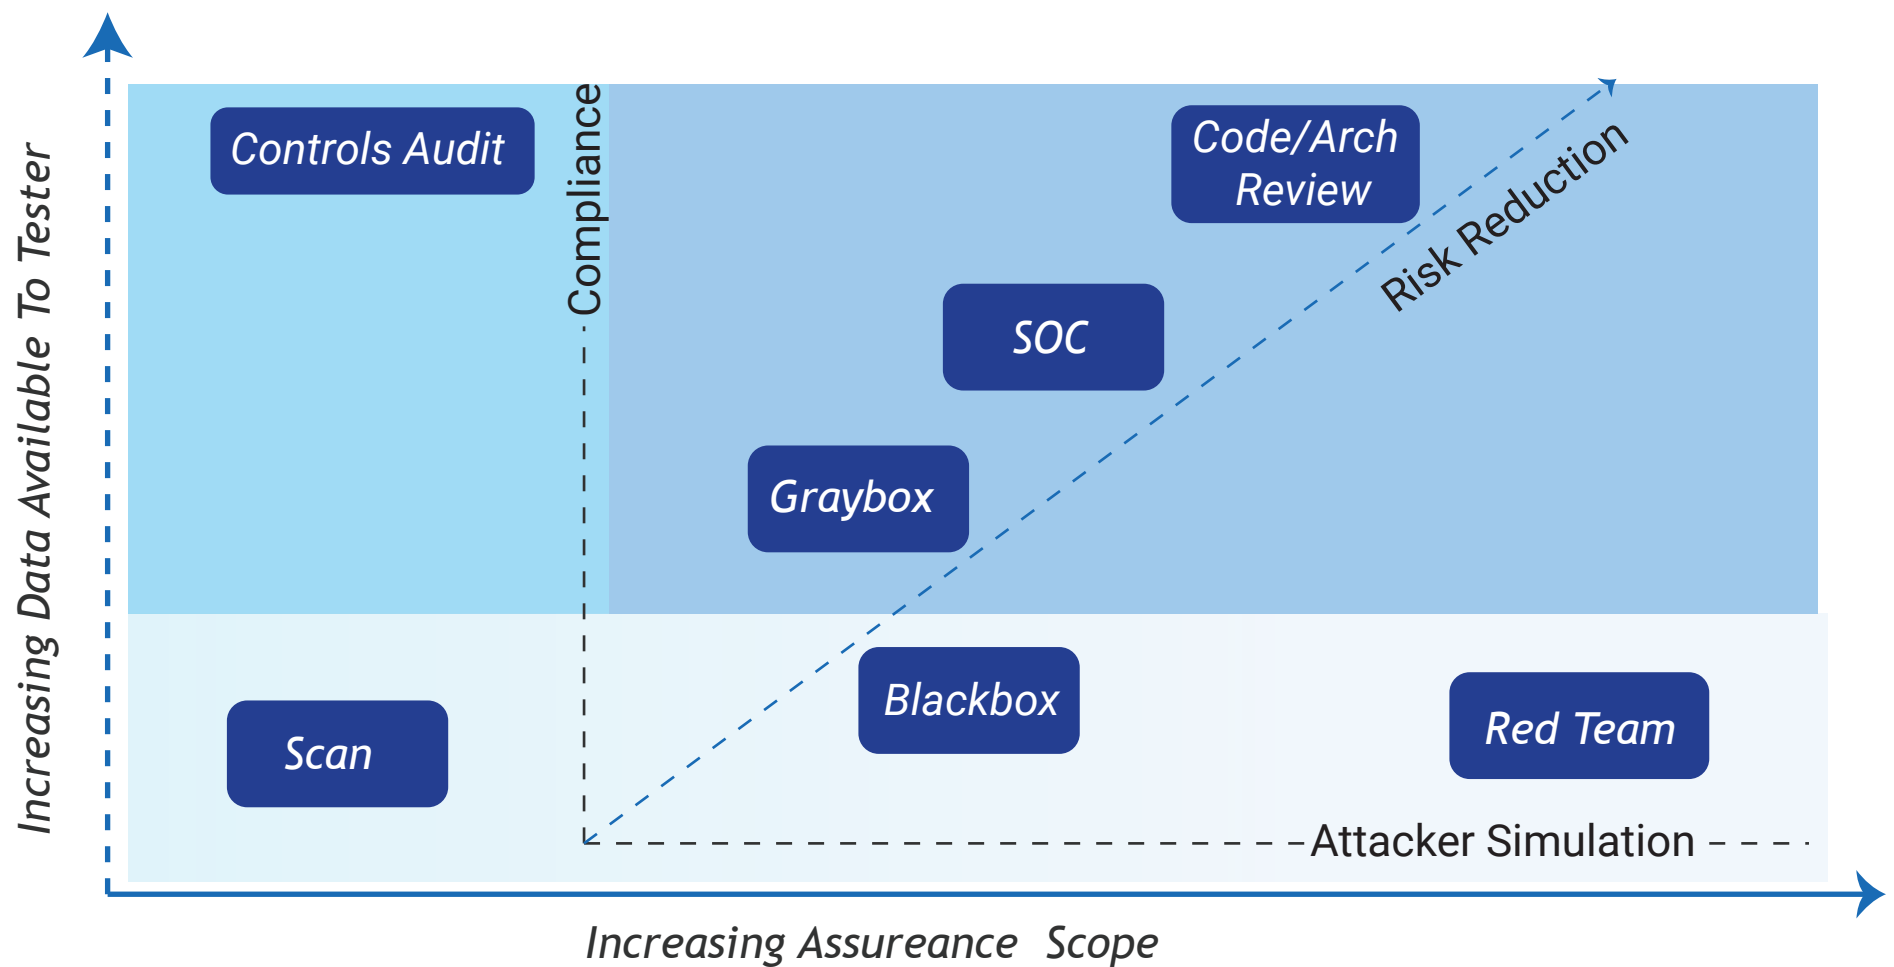

EIC closely collaborates with organizations, understanding unique challenges to deliver customized and effective cybersecurity solutions.

Global Standards

EIC adheres to international standards, ensuring that clients receive services aligned with the highest industry benchmarks for cybersecurity.

/// EIC's Way to Address Security

EIC offers a spectrum of services tailored to address distinct security needs. The Information Systems (IS) Audit, a meticulous examination, ensures compliance adherence, while the Vulnerability Assessment and Penetration Testing (VAPT) evaluates system robustness against potential threats. When considering an IS Audit, the focus is primarily on regulatory and compliance standards, ensuring that systems meet the required benchmarks. Conversely, SOC services for continuous threat monitoring, early detection, and rapid response to enhance overall cybersecurity effectiveness, minimizing the impact of potential security incidents. On the other hand, Red Team exercise delves into the proactive defense strategy by simulating an attack to identify and fortify potential vulnerabilities, offering a comprehensive approach towards shoring up the overall security posture.

Understanding when to leverage each service is crucial: IS Audit for regulatory alignment, VAPT for proactive defense evaluation, SOC for continuous monitoring and rapid response to detect and mitigate cybersecurity threats, and Red Teaming exercises for simulated attack scenarios to reinforce security measures effectively. EIC collaborates closely with organizations to discern their unique cybersecurity needs, guiding them to select the most fitting service from our offerings.

We partner with organizations that recognize the significance of security and seek a comprehensive evaluation of their security stance, leaving no stone unturned.

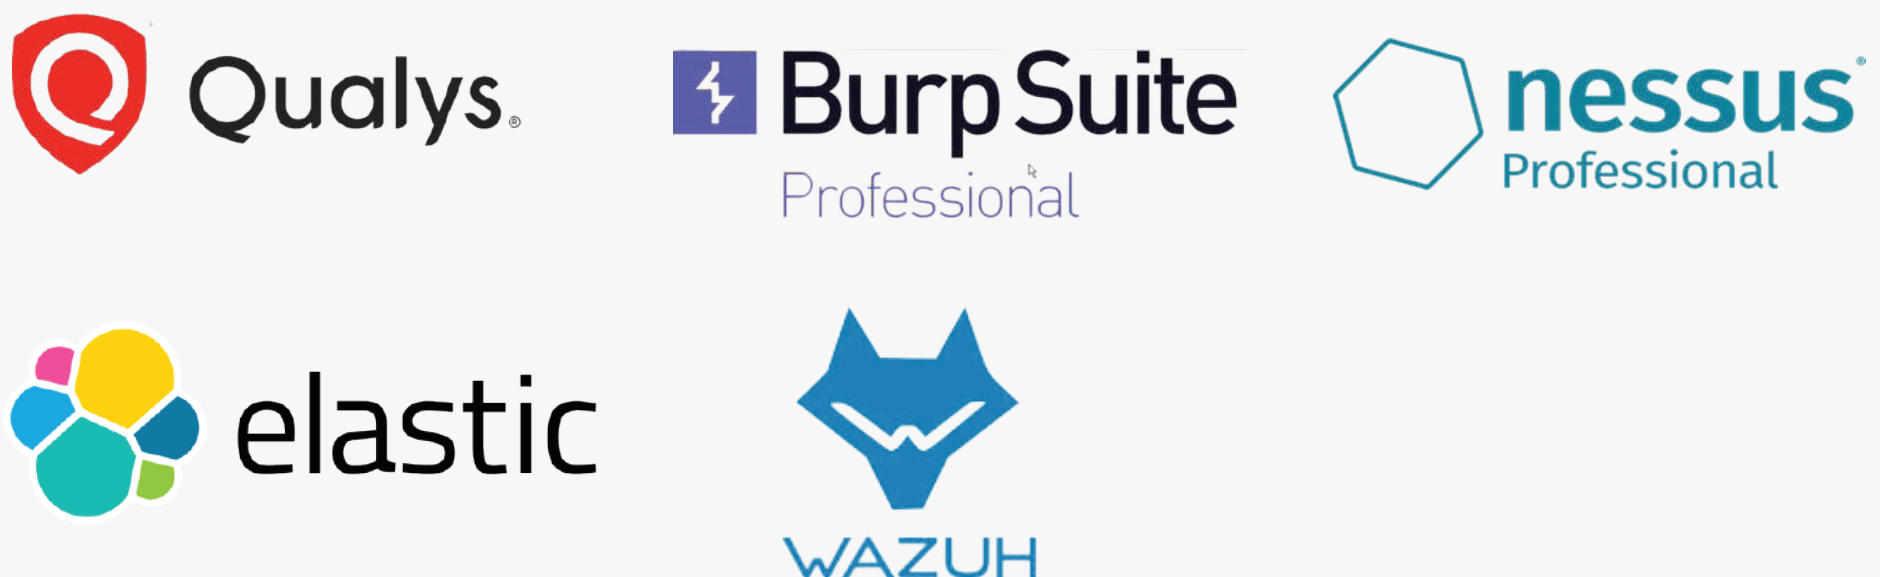

OUR SKILLSET

EIC specializes in cybersecurity domains, offering penetration testing, information system auditing, and information security compliance services. We stand out as a premier cybersecurity service provider, featuring a team of qualified and certified professionals dedicated to maintaining the highest standards of expertise. With a relentless focus on continuous improvement and staying abreast of the latest industry knowledge. Our commitment to excellence and proactive approach positions EIC as a trusted partner, ensuring robust protection for digital assets.

Certificates We Achieved

Licensed Tool We Use

Secure Your Business with EIC's Comprehensive Cybersecurity Services across a Wide Spectrum of Industries.

Industry Expertise

Financial Institutes

Financial institutions face constant cybersecurity threats, making robust protection imperative. With vast sums of sensitive data at stake, they must regularly assess vulnerabilities and enhance defenses against cyber risks. Our tailored services are equipped to detect threats early and establish proactive security measures, safeguarding the integrity of financial data and the stability of institutions in the face of evolving cyber threats.

Manufacturing

The manufacturing sector is highly susceptible to data breaches, yet it often lacks adequate protection. Consequently, manufacturers need to evaluate their risk profile and pinpoint vulnerabilities that may jeopardize sensitive data to cyber threats. EIC's services are designed to assist in early threat detection and the implementation of proactive measures to mitigate such risks.

Telecommunication

Cybersecurity is vital in telecommunications to protect data, network integrity, and privacy while ensuring regulatory compliance. EIC, with its specialized expertise, tailored solutions, advanced technology, and 24/7 support, is the top choice for safeguarding the sector's data and operations.

Health Care

Ensuring the security of healthcare data and safeguarding information are imperative for the smooth operation of healthcare institutions. Presently, healthcare institutions utilize diverse hospital information systems, including EHR, e-prescribing, practice management, clinical decision support systems, radiology information systems, and computerized physician order entry

Public Services

To drive economic growth the provision of public services in the digital domain carries immense value. But public services face continuous, pervasive, and relentless low-level, high-frequency attacks because of the importance of this information. However, this transition cannot be achieved without robust cybersecurity defenses in place.

Global Footprint

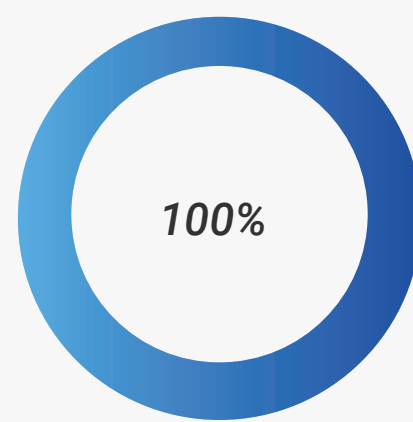

EIC stands as a dynamic and swiftly expanding organization, boasting a seasoned team entirely dedicated to the realm of cybersecurity. Our collective background and proficiency enable us to guide clients in comprehending their current IT infrastructure and identifying critical cybersecurity vulnerabilities. EIC is poised to provide organizations with a holistic cybersecurity solution regardless of the region or industry. Our extensive expertise spans a broad spectrum of sectors, ensuring we are well-equipped to serve clients' unique needs. Furthermore, our agile response team is always on standby, ready to assist clients in rapidly addressing cyber threats, assessing potential damage, and executing swift recovery measures.

Company Highlights

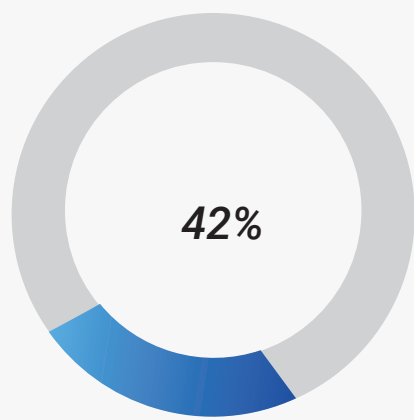

EIC is a service-based cybersecurity provider committed to safeguarding organizations against potential threats and vulnerabilities that unauthorized parties could exploit. We prioritize business risk by assessing the impact of cyber vulnerabilities and providing transparent communication on security issues. Our cybersecurity services effectively address security concerns across all platforms and product portfolios through this approach. We guide clients in minimizing risks from the ever-evolving threat landscape by enhancing their understanding of manageable vulnerabilities. With our comprehensive suite of services varying from IT Audit and compliance certification to offensive security services crafted for real-world scenarios within your IT environment to pinpoint weaknesses and strengthen your security posture, EIC positions clients at the forefront of the ever-evolving security domain.
