Introduction

ICT Limited G8ICT is a forward-thinking IT solution provider company headquartered in Bangladesh, committed to delivering high-quality, customized digital solutions that drive innovation and operational efficiency for businesses worldwide. Positioned at the intersection of technology and service excellence, G8ICT is emerging as a trusted partner for organizations seeking to harness the power of digital transformation.

G8ICT was founded with a vision to bridge the gap between technology and business needs, offering a comprehensive suite of services including design, implement, and support a wide range of IT solutions; develop customized software, apps, IT systems; build and integrate different IT solutions eg. server, storage, security, ERP, network, database, reporting etc. The company serves clients across a wide range of industries, including government, agriculture, law enforcement agencies, power & energy, finance and healthcare sectors.

In Bangladesh, ICT ecosystem is growing rapidly, G8ICT leverages the country's strong pool of tech talent, competitive cost advantages, and supports digital infrastructure to offer world-class services. The company is also committed to contributing to the local tech community by nurturing talent, supporting digital literacy, and promoting inclusive growth. With a focus on integrity, excellence, and long-term value creation, G8ICT stands out as a reliable technology partner for businesses looking to thrive in the digital age.

About G8ICT Limited

In 2016, G8ICT Limited merged with Click2sys, a company founded in 2009 with a focus on IDEA-driven innovation in ICT solutions. This collaboration brought together a strong network of global technology partners and experts, powered by the unique blend of leadership, technical expertise, and business acumen of the G8ICT team. The G8ICT team is composed of highly skilled and seasoned professionals committed to delivering effective, innovative solutions.

Vision

To become a global leader in ICT by unlocking the full potential of technology to empower businesses, improve lives, and positively impact society.

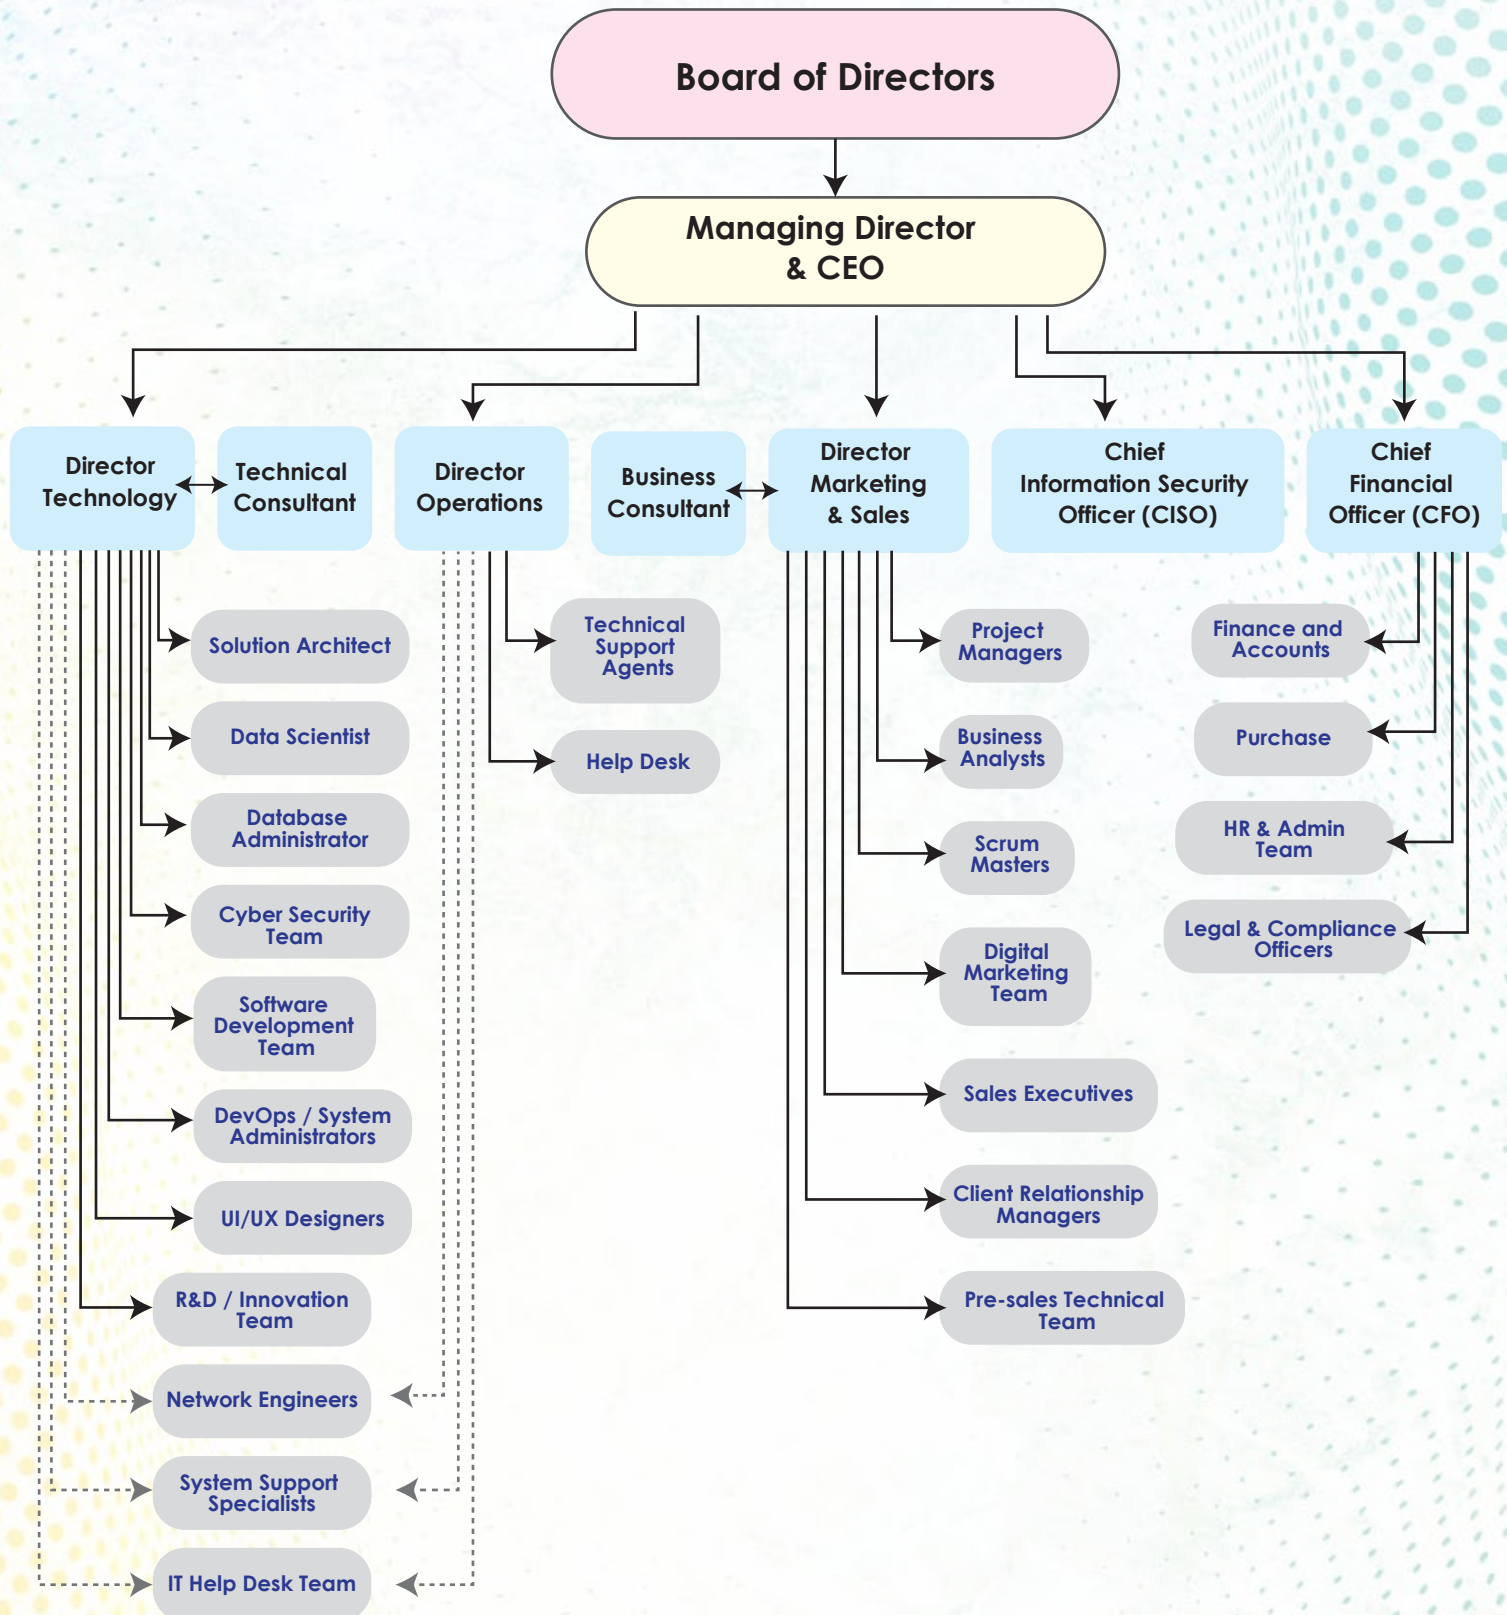

Mission

To design and deliver innovative ICT solutions that drive business excellence, empower individuals, and contribute meaningfully to a smarter society.

Core Values

- Innovation – Embrace creativity and forward-thinking
- Integrity – Operate with transparency and trust
- Customer-Centricity – Put clients at the heart of everything we do
- Collaboration – Achieve more through teamwork and partnerships
- Excellence – Commit to high-quality and continuous improvement
- Social Impact – Enrich communities through technology

Management Organogram

Network Infrastructure Building

We design and implement scalable, secure, and high-performance network infrastructures to support digital growth. Our services include structured cabling, LAN/WAN setup, wireless network deployment, and data center solutions, ensuring seamless connectivity and future-ready systems.

Cybersecurity Solutions

We provide end-to-end cybersecurity services to protect your organization from digital threats. Our solutions include firewall implementation, endpoint protection, intrusion detection and prevention systems (all guided by industry best practices, IDPS), vulnerability assessment, SIEM integration, and compliance management.

Application Development

Our custom software and mobile app development services are built to transform business operations. From enterprise platforms to user-centric mobile applications, we deliver robust, scalable, and secure solutions aligned with your business goals and user needs.

Mail Service Management

We offer comprehensive email and collaboration service deployment and management, including cloud-based solutions like Microsoft 365, Google Workspace, Fortimail and secure in-house mail servers. We ensure uptime, security, spam protection, and seamless user experience.

IP Telephony & Video Conferencing (VC) Systems

Our unified communication solutions include IP-based telephony systems and enterprise-grade video conferencing setups. We help clients streamline communication with VoIP, PBX systems, and HD video conferencing tools that enhance collaboration and reduce operational costs.

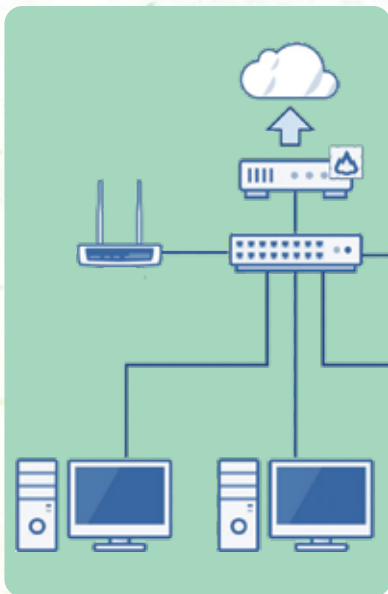

Access Control and CCTV Surveillance Systems

We implement smart access control and surveillance systems to enhance organizational security. Our offerings include biometric access, RFID card systems, turnstiles, time attendance systems, and integration with existing IT infrastructure for centralized control and monitoring.

Business Products
