

Corporate Profile of Wirac (Bangladesh) Ltd.

Message from Founders

Md. Sayeduzzaman
Founder

We are committed to driving digital transformation through innovative ERP solutions. With a focus on efficiency and growth, we empower businesses to optimize operations and achieve sustainable success.

Ahamed Amjad Hossain ACA
Co-Founder

Our team of experts delivers tailored ERP implementations that align with your unique business needs.
By leveraging cutting-edge technology, we help you harness the power of data and make informed decisions.

About Us

At Wiracbd, we offer a complete portfolio of SAP Business One IT solutions including ERP solutions, analytics, and cloud. We help small and midsize businesses, large enterprise and public sector customers to implement, integrate and maintain SAP solutions throughout the complete process value chain.

We think business software should cover complex needs without being complicated. Our mission is to provide software that is intuitive, full-featured, tightly integrated, effortless to upgrade, all while running smoothly for every business, every user.

Vision:

We aim to be the first choice of our clients when the need calls for high-profile technical talents. At the same time, we aspire to be the naturally preferred employer for the best caliber professionals. To be recognized as one of the leading efficient professional service providers in this region on the area of organizational and individual effectiveness as measured by successful client relationships.

Mission:

To help entities-small or large, public or private, for-profit or not-for-profit—achieve their strategic objectives by maintaining the highest professional standards and also to dedicate utmost professional efforts on finding ways to better serve the clients.

Goal:

To establish the building blocks on which an entity continues its ongoing growth and eventually flourishes without outsourced interventions.

Wirac (Bangladesh) Ltd.

Head Office: Plot-9, Road-3, Block-I, Banani, Dhaka-1213

Phone: +88 02 222 271 623, **E-mail:** info@wiracadv.com, **Web:** www.wiracadv.com

Values:

- Be ethical in all of business activities, provide the highest quality services and communicate with probity and candor.
- Respect the organizational environment of each client and strive to ensure client delight and also to reinforce effective organizational leadership.
- Establish an enduring partnership with clients through value-adding relationship with the board/governing body, management and staffs.
- Maintain a professional culture that positively fosters and rewards high performance.

ERP Service(s)

Consulting

We help companies analyze their current business processes, help them to select the most suitable ERP solutions within the budget and plan the smoothest implementation strategy for them.

Customization

A standard ERP solution cannot fit all business requirements. We know that very well. Our strong ERP developer team customizes our ERP solution based on the customer's business needs.

Integration

Nowadays the whole world is connected. We help connect ERP solutions with the company's existing software or any other internal software or apps with our powerful API system.

Implementation

We make a strong implementation plan, set a solid strategy, and implement ERP software solutions in your organization. Our end-to-end implementation includes process analysis, strategy, deployment, training, and all.

Testing & Maintenance

We validate ERP software functionality, performance, compatibility, and usability to ensure it meets the company's requirements and user expectations. We tie up for long-term ongoing maintenance with clients.

Enterprise Resource Planning(ERPs)

Enterprise Resource Planning Softwares Are More Important Than Ever Before

In today's business world with so many demands on employees and time, placement of the right resources at right place and time is challenging like never before

ERP software's that we provide services for.....

SAP Business One

SAP Business One (SAP B1) is an enterprise resource planning (ERP) software that can help small and medium-sized businesses (SMBs) manage their operations. Here are some reasons why you might choose SAP B1:

- **Cost-effective**

SAP B1 is a cost-effective option for SMBs, and it can provide a significant return on investment over time.

- **Scalable**

SAP B1 is fully scalable, so it can grow with your business.

- **Remote management**

You can manage your business processes remotely with SAP B1, as long as you have an internet connection.

- **Streamlined processes**

SAP B1 can help you streamline key processes, such as accounting, purchasing, sales, customer relationships, and reporting.

- **Automated processes**

SAP B1 can automate routine processes, which can help you increase productivity.

- **Flexibility**

SAP B1 offers a range of options that allow you to make simple changes to your system with minimal technical expertise.

- **Integrations**

You can integrate other applications and plugins with SAP B1, such as Microsoft Office 365, warehouse management software, and e-commerce applications

SAP B1 is arranged into fifteen functional modules covering the typical functions in a business organization. The following is the list of these modules:

- **Administration:** This module holds the core settings of the entire application.
- **Financials:** Core journal entries are entered into this module and the Chart of Accounts can be created here.
- **CRM:** This module connects the common sales employee tasks to other modules.
- **Sales A/R:** This module helps manage and automate the sales flow.
- **Purchasing A/P:** This module allows the management and automation of the purchasing flow.
- **Opportunities:** This module keeps track of potential sales and purchases using lead generation.
- **Banking:** This module contains details of all the incoming and outgoing payments.
- **Business Partners**
- **Master data of Leads, Customers, and Suppliers** are stored in this module.

- **Production:** This module creates production orders and stores the bill of materials master data.
- **Resources:** Here, the master data of resources to be used in production are defined.
- **Inventory:** Master data, including tracking, of goods to be sold or purchased is maintained in this module.
- **Project Management:** This module helps design project workflows and stores them for future reference.
- **Material Requirements Planning (MRP):** Forecasts of required items in sales and production are created to make purchase order recommendations in this module.
- **Service:** This module maintains all the service contracts and has features that help create service calls.
- **Human Resources:** Employee master data and information is maintained in this module.

ERPNext

ERPNext is an open-source ERP system that can be a good choice for businesses because of its many features and benefits, including:

- **Comprehensive features**

ERPNext offers a wide range of features and modules for managing a business, including accounting, sales, purchasing, inventory management, manufacturing, and project management.

- **Customization and flexibility**

ERPNext is highly customizable and flexible, and can be scaled as your business grows.

- **User-friendly interface**

ERPNext has a user-friendly interface and features for collaboration and communication.

- **Built-in integrations**

ERPNext has built-in integrations with Google, PayPal, Slack, and Shopify.

- **Cost-effective**

ERPNext is free and open source, and provides a complete package without additional fees.

- **Automates tasks**

ERPNext can automate tasks and processes, which can free up employees to focus on more strategic work.

- **Improves efficiency**

ERPNext can improve efficiency and reduce costs by automating the flow of information of goods and materials.
